(54) POWER SOURCE CONTROL SYSTEM

(57)Abstract:

PURPOSE: To simplify the use of a VTR incorporated type TV device when the state tha a tuner for video recording a VTR is in an unused state, the source of the VTR is turned on and a mechanism is stopped is continued for a prescribed time by turning off the source.

CONSTITUTION: When a main power source switch SW1 is turned off from on, and a TV source switch SW2 is also turned off from on, whether the device is in a video recording state or in a video recording pause state is judged, and according the decision, a timer is made a stand-by state or the VTR source is made an interruption state. When the switch SW1 is turned off from on, when no SW2 is turned off from on, whether or not power source is supplied to the tuner is judged, and when in the operation state, a one minute timer circuit is initialized. Then, when no power source is supplied to the tuner, whether or not the VTR source is turned on is decided, and when the source is stopped is judged, whether or not a cassette is ejected is judged, and then ejected beforehand, the VTR source is turned off.
